

Mercedes-Benz 200 Stromlinienlimousine (1934)

Version 1.00 FINAL for RACER car simulation

Find more information about this car and others on www.motorpsort-klassiker.de.vu.

Install the files in a folder called "200_Jaray" in your RACER\data\cars folder. This car is designed for RACER Version 5.2 BETA 6 or higher.

Compared to the most recent version (1.00 Pre-Release), there are some improvements:

- Fine-tuned textures
- Fixed shaders
- improved shadow
- correct grille
- correct rear window

This vehicle has been released on August 22, 2004.

This car could not have been realized as you see it without the help of...

- Sam Jigga (RaceSim Central Forums) for generously providing nice shaders;
- Patrick Granger for providing detailed photos;
- Taron GH (RaceSim Central Forums) for rendering the car.

This car is part of Fabian Junker's project Motorsport-Klassiker (www.motorsport-klassiker.de.vu). You are not allowed to modify it or distribute any parts of it without written permission.

Attention: You are not allowed to upload this car nor host it on Racer-Xtreme.com (<http://www.racer-xtreme.com>)!

Thank you,
Fabian

Next release:
Mercedes 540K Roadster

Thanks to TheNeuteredCat for hosting this car!
